

BILURU GURUBASAVA MAHASWAMIJI INSTITUTE OF TECHNOLOGY, MUDHOL

TECHATHON 2025 – 24-Hour Hackathon (21–22 November 2025)

This document outlines the general rules and guidelines for participating in the TechaThon 2025. All problems are designed to require a **full 24-hour cycle**, involving design, coding, simulation, testing, documentation, and presentation.

Rules

1. All participants must register before the event starts.
2. Each team must consist of the approved number of members only.
3. Every team must bring their own laptop (minimum one per team).
4. Teams must also bring their own extension box / multi-plug for power supply.
5. Participants should carry their college ID cards for verification.
6. Internet usage will be as per event guidelines.
7. Any form of plagiarism or unfair means will lead to disqualification.
8. Teams must follow the given time schedule strictly.
9. Judges' decisions will be final and binding.
10. Maintain discipline and respect throughout the event.

General Rules of the Hackathon

1. Team Composition

- Each team must consist of **3 to 4 participants**.
- Team members can be multidisciplinary.

2. Tools Allowed

- AI tools like ChatGPT, Gemini, Claude, and GitHub Copilot are permitted for debugging, design assistance, content writing, testing, and automation support.
- **Only the following software are permitted for ECE problems:**

- Scilab / Scilab Xcos
- C Language (GNU GCC / CodeBlocks / VS Code)
- Verilog simulators (Icarus Verilog, EDA Playground, Vivado Simulator – no FPGA hardware)

3. Restrictions

- **NO hardware components** allowed. Projects must be **simulated**, not physically implemented.
- Internet Usage is permitted only for development-related work (research, reading). Copy-pasting pre-written code is prohibited.
- Teams must maintain silence and discipline inside the venue.
- Doubts and queries will be addressed by mentors only during their scheduled visits.
- Teams must save and back up their work regularly, both locally and on a public GitHub repository.
- Reusing prebuilt project templates or existing codebases will result in disqualification.

4. Deliverables (Compulsory Submission)

Each team must submit the following items before the final deadline:

1. **Source code** (C / Scilab / Verilog).
2. **Simulation results** (screenshots, timing diagrams, plots).
3. **Working demo (5–7 minutes)** presentation.
4. **Project report (PDF)** of 4–5 pages including:
 - Problem definition
 - Methodology
 - Algorithms used
 - Results & analysis
 - Conclusion
5. Each team must push the final project to a public GitHub repository before the submission deadline.

Step-by-Step Workflow Documentation

In addition to the main deliverables, teams are required to submit a detailed workflow documentation including:

- Problem statement
- Methodology
- Flowchart / block diagram

- Screenshots of development stages
- Intermediate simulation outputs

5. Judging Criteria

The projects will be evaluated based on the following criteria:

Criteria	Marks
Innovation & Understanding	25%
Technical Implementation and Code Quality	25%
UI/UX Design and User Flow / Simulation Accuracy	20%
Completeness of Features	20%
Presentation & Report	10%

6. Code of Conduct

- Internet allowed only for **research and reading**, not for copy-pasting code fragments.
- Teams must work inside the designated hackathon venue .

7. Time Duration

- Total Hacking Time: **24 hours** (21 Nov 11:00 AM – 22 Nov 9:00 AM).
- Intermediate checkpoints will be evaluated by mentors ( Calendar event).

Tentative Time Management Workflow

Time (Hours)	Activity
0–2 hrs	Problem understanding + Planning
2–8 hrs	Coding / Design
8–12 hrs	Simulation + Testing
12–18 hrs	Error fixing + Final code
18–22 hrs	Report + PPT preparation
22–24 hrs	Final demo rehearsal

8. Tentative Role Chart

The following roles are suggested for effective team collaboration:

Role	Responsibilities
Team Lead	Planning, architecture, coordination
Programmer	Main coding, logic design
Simulation Engineer	Testing, debugging, simulations
Documentation Engineer	Report, PPT, diagrams
